

# 2020 ANNUAL REPORT

---

## WHERE WE ARE

---

Greetings all,

2020 was a challenging year to be sure, but we suspect it was a pivotal year as well. Our global ecosystems threatened, our social cohesion frayed, and our economic systems in clear need of rethinking, we hope that 2020 will prove to be the year when action on all of these interrelated fronts became an urgent imperative.

While the whole world wobbled, here in the borderlands we continued our work to rebuild resilience in the face of a deepening climate crisis, restore critical wildlife habitat, and reconnect our communities to their home watersheds. We also took 2020's cue to question norms and do some pivoting of our own.

Among other things, we seized the opportunity to look deeply at our mission, strategies, climate change impacts, and repositioned some of our efforts and programming to help address critical unmet healthcare needs in a partner community.

We believe a sea change is on the horizon and we will continue to do our part in hastening its arrival.

Sincerely,

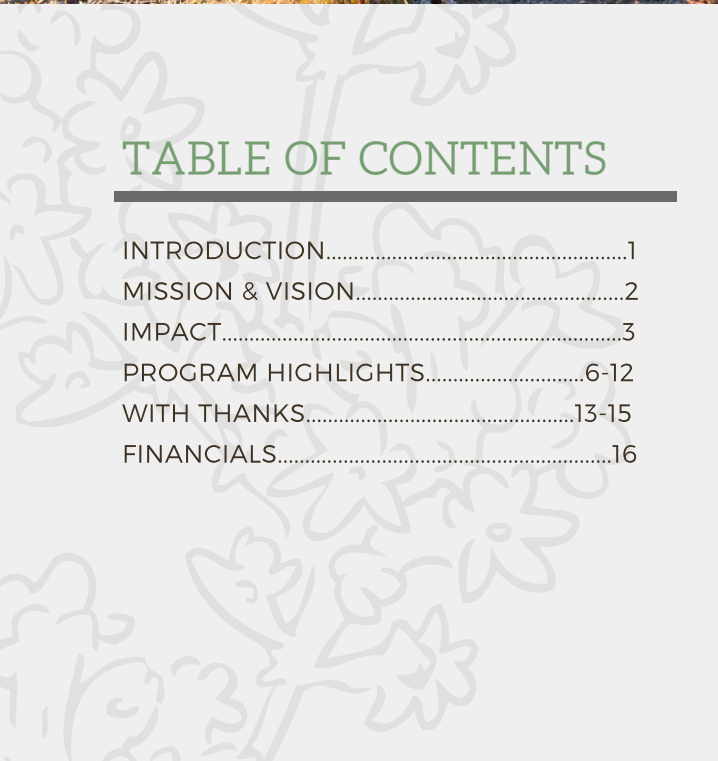

Kurt Vaughn PhD, Executive Director

Doug Smith PhD, Board President

# OUR MISSION

We partner to grow a restorative economy by rebuilding healthy ecosystems, restoring habitat for plants and wildlife, and reconnecting our border communities to the land through shared learning.

# OUR VISION

We partner to grow a restorative economy by rebuilding healthy ecosystems, restoring habitat for plants and wildlife, and reconnecting our border communities to the land through shared learning.

# OUR PROGRAMS

Borderlands Restoration Network programs apply a multi-pronged approach to rebuild, restore and reconnect the borderlands region to heal the land from erosion, overgrazing, climate changes, aridification and development that has degrades the landscape. Our programs work together to repair the land, support ecosystems and strengthen our communities while inspiring learning and stewardship of our shared spaces on both sides of the border.

*Watershed  
&  
Habitat  
Restoration*

*Native  
Plant  
Program*

*Education  
&  
Outreach*

*Borderlands  
Wildlife  
Preserve*

## NETWORK PARTNERS

**Wildlife  
Corridors, LLC**

BRN is a 501c3 nonprofit, but also an umbrella organization for a network of independent organizations working toward common goals. Our organizations collaborate and share resources and knowledge to achieve things we could not do as a single organization.

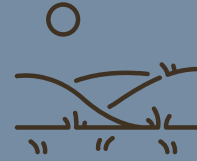

## OUR IMPACT

**2,500 Collections  
of Native Seed  
Collected from  
200 Species**

**250,000  
Native Plants  
Propagated**

**600 Acres of  
Public & Private  
Land Restored**

**1,590 Education  
Program  
Participants**

**2000 Erosion  
Control Structures  
Installed**

**60+ Program  
Partners**

## OUR STORY

Launched in 2018, Borderlands Restoration Network is the vision of one of our founders Dr. Ron Pulliam, celebrated ecologist, professor and former science advisor to the Secretary of the Interior during the Clinton Administration.

Ron fell in love with the region studying our unique grassland birds. He retired to Patagonia with his wife Janice and has since founded Borderlands Restoration L3C, Wildlife Corridors LLC and Borderlands Restoration Network.

## SENIOR FELLOWS

BRN Senior Fellows and Advisors help build organizational capacity and expand our knowledge base by bringing experienced practitioners, educators, and leaders to BRN. Senior Fellows are supported to propose projects and programs that contribute to BRN's mission.

*José Manuel Pérez Cantú*  
**Conservation Director,  
Cuenca Los Ojos**

*Dr. Laura Monti*  
**Cultural Ecologist, Prescott College  
Kino Bay Center for Cultural &  
Ecological Studies**

*Alan Lamborn*  
**Retired, Associate Provost for  
Educational Attainment, Colorado  
State University/Executive  
Director, Reinvention Collaborative**

*Dr. Gary Nabhan*  
**Author, Agricultural Ecologist,  
Ethnobotanist, & Ecumenical,  
Franciscan Brother**

*Dr. Laura M. Norman*  
**Supervisory Research Physical  
Scientist, U.S. Geological Survey**

*Dr. Richard Pritzlaff*  
**Board Member, Biophilia Foundation**

*Dr. Ron Pulliam*  
**Regents Professor Emeritus in the  
Eugene P. Odum School of Ecology,  
University of Georgia**

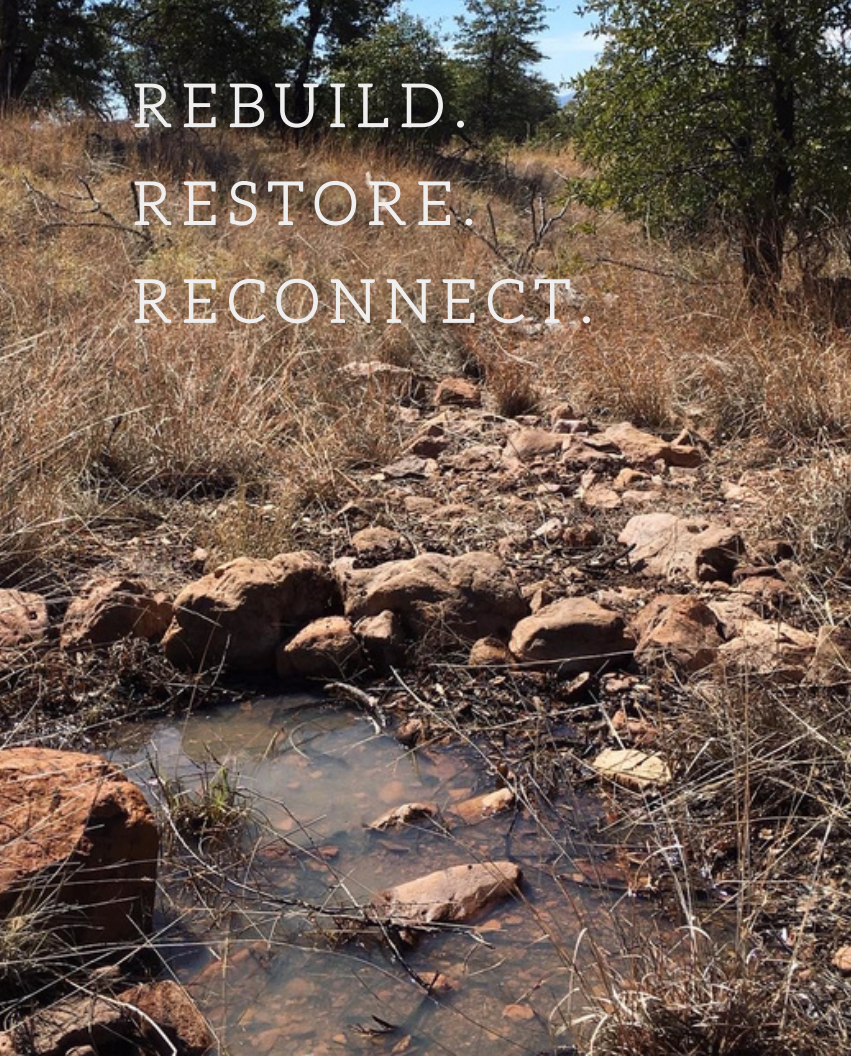

*Dr. David Seibert*  
**Ecological Anthropologist**

*Dr. Tom Sisk*  
**Olajos-Goslow Professor of  
Environmental Science and Policy,  
Northern Arizona University**

*Kate Tirion*  
**Permaculturist & Owner,  
Deep Dirt Farm**

REBUILD.  
RESTORE.  
RECONNECT.

# WATERSHED & HABITAT RESTORATION PROGRAM

*Employing a multi-pronged approach to restoring degraded landscapes to a trajectory of recovery and climate resiliency.*

*Installed 380 erosion control structures across 200 acres*

*Controlled invasive plants on 77 acres of the Borderlands Wildlife Preserve*

*Planted 600 native plants & collected 52 lbs of seed*

*Removed invasive plants from 6 acres of the Mansfield Mine Reclamation site*

*Controlled invasive grass on 5 acres protecting one of only six known populations of Beardless chinchweed in the US*

# NATIVE PLANT PROGRAM

*Promoting and protecting biodiversity and ecosystems in the Sky Islands by providing access to restoration-quality native plant materials.*

*Propagated over 20,000 plants representing more than 200 native species*

*Hand collected and cleaned over 400 lbs of seed in 800 collections*

*Sold 3,850 native seed packets*

*Grew out 2,500 plants for the Glenn Canyon National Recreation Area*

*Cared for hundreds of salvaged plants for the Mansfield Mine reclamation project*

*Planted over 750 agaves across SE Arizona to support nectar feeding bats*

*Planted 1,000 Emory oak acorns across 250 acres of the Borderlands Wildlife Preserve*

# BACANORA FOR BATS

## A BIG WIN FOR NECTAR FEEDING BATS OF THE BORDERLANDS

Everyone needed a win in 2020, and we got one for nectar feeding bats that rely on flowering agaves to sustain them along their migratory pathways across Mexico to the U.S. and back. Agaves in the region are disappearing due to increased production of the regional agave distillate, bacanora.

In 2019, the Salazar Center for North American Conservation at Colorado State University launched its inaugural Conservation Impact Prize, a \$100,000 incentive award designed to fund meaningful change in the field of conservation. Known as the Connectivity Challenge, this prize funds a proposal that drives innovation in landscape connectivity for habitat and community benefit in North America.

Forty-six applications were received from across the US, Canada and Mexico after which an expert panel of judges reviewed the proposals. Five finalists were selected to participate in a pitch fest as part of the Center's annual symposium to compete for the single \$100,000 prize. Borderlands Restoration Network came out on top securing the inaugural prize for this competition along with its project partner in Mexico, Colectivo Sonora Silvestre, which was founded by two alumni of the BRN Field School.

With this prize we will strengthen community-based restoration of bacanora agaves through policy change by collaborating with universities, herbaria, government agencies, local policy regulators, nonprofits, producers, and consumers in Mexico and the U.S. Connectivity of wild agave populations and impacts to pollinators on both sides of the border will be evaluated supporting the creation of a cooperative, science-based, sustainability certification for bacanora production.

# EDUCATION & OUTREACH

*Empowering and inspiring the next generation of conservation leaders in the borderlands through placed-based learning opportunities and skills training.*

*Collaborated to design and build the Huachuca City Community Garden & water-retention basins*

*Engaged 10 O'odham youth interns and two local facilitators in the Şu:daḡi 'O Wud Doakag (Water is Life) program*

*94 community members participated in the Mesquite Stewardship Program*

*Hosted 43 students from two visiting groups & seven AZ graduate students*

*Hired four interns from Hermosillo, Sonora*

*Women Grow Food spent 400+ hours learning permaculture growing techniques producing 15 different crop varieties*

*Hosted nine virtual events including workshops and social media events*

# CROSS BORDER LEARNING

## CROSS BORDER LEARNING BRINGS LIGHT IN A PANDEMIC

As the pandemic set in we were faced with rethinking how we could continue some of our intended work in a safe way. The 2020 Field Course scheduled to be held in Sonora, Mexico had to be canceled, but we shifted to a virtual format hiring four interns from Sonora to learn with us virtually.

Through zoom training with our program staff, virtual conference attendance and other learning opportunities an interest and love for native plants rose to the surface, ultimately leading to a collaboration with a local school in Hermosillo, Palo Alto Escuela Americana. One of the interns, Omar, proposed the idea of building a nursery at the school to produce native plants to support the restoration and reforestation programs in Sonora.

Palo Alto Escuela Americana and BRN will work to raise student awareness of environmental issues, promote values focused on environmental care and foster future leaders in conservation.

Today the project is complete and seeds have been started in more ways than one. The green house will have a space for native plant production, biointensive beds to grow food in a small space and make compost, as well as an exterior garden for pollinators.

When the children return to school, they will adopt this new project which will accompany them through their elementary education. With their fill of dirt, they will learn about native flora, the importance of reforestation and growing their own food. Undoubtedly this has been a great team effort, especially during uncertain times that will have long-standing benefits to the students and the community.

# BORDERLANDS WILDLIFE PRESERVE

*A segment of the Sonoita Creek Wildlife Corridor, the 1400 acre, and growing, Borderlands Wildlife Preserve is protected and managed to conserve critical wildlife habitat, and maintain a route for migratory species.*

*Identified over 20 species of animals on seven wildlife cameras, including the endangered yellow-billed cockoo*

*Installed 10 interpretive signs along hiking trails, new welcome kiosk signage and a drinking fountain*

*Over 1000 visitors came to the BWP to hike or enjoy the preserve*

*Site for seven restoration projects*

*Won funding to protect 500 acres as part of the USFS Forest Legacy Program*

*Completed the two-mile Cross Corridor Trail*

*Maintained three wildlife drinkers and Dragonfly Pond to support wildlife*

# COVID RELIEF & THE SERI

## SHIFTING GEARS TO HELP NEIGHBORS IN NEED

While public health may not be our primary focus, the well being of the people of the borderlands certainly is. When COVID struck, not everyone had access to health care, supplies and support to protect their communities. The Comcáac Indigenous Community, or Seri, with whom we have a long standing relationship with through BRN Senior Fellows, Laurie Monti, and Dr. Gary Nabhan, are a perfect example.

Assistance to help combat COVID was not readily available to this vibrant community so they reached out to Laurie, who also happens to be a nurse. Laurie and others sprung into action organizing fundraising efforts, procuring supplies and transporting needed relief to the Seri in Sonora.

Thanks to the support of donors, numerous organizations and the plain determination of Laurie and the Seri themselves, two medical response clinics were established and stocked with the necessities to help save lives.

Supplies included six oxygen concentrators disposable masks, tubing, a sterilization unit, oximeters, personal protective gear, sanitizer, and medications. Thanks to a generous donor, hundreds of handmade fabric reusable masks were also supplied to help protect this community over the long haul.

Each clinic was provided with satellite internet and integrative healthcare teams, including six health promoters supported by expert herbalists, bringing together modern medical treatment with traditional desert plant medicine to treat patients with Covid-19. The health care teams in both villages worked around the clock, seven days a week to care for patients undoubtedly saving countless lives.

# With thanks...

# 1,151 Volunteer Hours from 56 Volunteers

## GET INVOLVED

Join us today so that together we can rebuild, restore, and reconnect the borderlands.

### VISIT.

Come see for yourself the ecological restoration work happening in the borderlands. Contact us for tours, shop Borderlands Nursery & Seed, or join us for a nature walk or workshop

### VOLUNTEER.

Put your hands where your heart is and join volunteers in our nursery or seed lab and on restoration projects to help Borderlands Restoration Network do things we couldn't without your help! Email us at [info@borderlandsrestoration.org](mailto:info@borderlandsrestoration.org).

### BUY OUR PLANTS & SEEDS.

Visit Borderlands Nursery & Seed to purchase our ethically collected, chemical free and pollinator safe plants and seeds. Visit our website for complete details: [www.borderlandsplants.org](http://www.borderlandsplants.org).

### DONATE.

Nothing is possible without the generous support of our donors. Visit our website for complete details about all our giving opportunities. Restoration Partners and Founders Society Members receive 10% of nursery purchases.

### STAY IN TOUCH.

Follow us on social at: [Facebook.com/borderlandsrestorationnetwork](https://www.facebook.com/borderlandsrestorationnetwork) or Instagram @BorderlandsRestoration, and make sure to sign-up for our newsletter via our website. Follow Borderlands Nursery & Seed @borderlandsplants on Facebook and Instagram.

### HIRE US.

Borderlands Restoration Network offers consultation and implementation services for native landscaping, rain gardens, and rainwater harvesting systems in your yard. Contact [cweaver@borderlandsrestoration.org](mailto:cweaver@borderlandsrestoration.org) for more information.

Phone: (520) 216-4148

Address: PO Box 121, Patagonia, AZ 85624

Email: [info@borderlandsrestoration.org](mailto:info@borderlandsrestoration.org)
