

### Mission

We partner to grow a restorative economy by rebuilding healthy ecosystems, restoring habitat for plants and wildlife, and reconnecting our border communities to the land through shared learning.

### Vision

We envision connected borderlands where rivers flow, plants, wildlife and cultures thrive, and communities develop an inclusive restorative economy where a sense of place inspires a sense of purpose.

Borderlands Restoration Network programs apply a multi-pronged approach to rebuild, restore and reconnect the borderlands region to heal the land from erosion, overgrazing, climate change, aridification and development that degrades our landscape. Our programs work together to repair the land, support ecosystems and strengthen our communities while inspiring learning and stewardship of our shared spaces on both sides of the border.

# 2021 Annual Report

# Our Impact since inception

- 2,590 Collections of Native Seed Collected from 770 Species
- 300,000 Native Plants Propagated
- 3,774 Agaves Planted for Nectar Feeding Bats
- 1,200 Acres of Public & Private Land Impacted
- 2,195 Education Program participants
- 3,371 Erosion Control Structures Installed
- 60+ Program Partners

## Financials

\*The information presented above is drawn from Borderlands Restoration Network's 2021 audited financial statements from BeachFleischman PC.

## Rebuild healthy ecosystems

 3,265 volunteer hours

Ethically collected **880 lbs** of native seed 

 Propagated **30,000** plants from 263 species for restoration projects, contracts, and retail sale

**45** volunteer citizen scientists mapped *Agave palmeri* to identify important locations and population health in support of nectar feeding bats 

 Created *Growing Agaves for Bats* booklet detailing agave seed collection, plant salvage, propagation, planting of agaves for habitat restoration in support of nectar-feeding bats

Contracted by US Fish & Wildlife to plant **13,000** native plants to enrich habitat at the Buenos Aires National Wildlife Refuge area 

 Surveyed four wild crop relatives at the Wild Chile Botanical Area and collected seeds for research

## Reconnect our communities to the land through shared learning

The impact BECY had on me was opening my eyes to the environment, learning what exactly is around me and how I can give back to it, especially when it comes to restoring the land that is already there and helping out the wildlife that is already here. To give to it is really special.

Diego Soto  
1st Year BECY Participant

 **905** participants in education programs & workshops\*

 **195** youth participants

 **5** visiting educational groups

**66** paid youth interns 

Programs included: Sonoran Field Course, Borderlands Earth Care Youth, Water is Life, Mesquite Workshops, Desert Food for Resilience Workshops, and Women Grow Food.

## Restore habitat for plants and animals

 **1,371** erosion control structures installed securing 300 tons of soil increasing groundwater capture

 **110 acres** of invasive species controlled to enhance native grasslands and improve wildlife habitat

 **252** additional acres acquired to be protected

 **93** wildlife surveys and 1 archeological survey conducted

**50 lbs** native pelletized seed distributed in the landscape 

**731** native plants outplanted for pollinator and wildlife habitat improvement 

 **50 acres** of quail habitat improved and 1 Montezuma Quail survey

 **200** native plants installed at Dragonfly Pond
